Even the people with zero background in the topic could readily grasp its nature and fundamentalities. My suggestion would be to disseminate all this wisdom of aquaculture and the related attributes down to the local communities so that necessary awareness may be created and consequently a sufficient space for the evolution of aquaculture as a sustainable economic alternative can be achieved in the near future.

9-22-2020 13:10:32	ekilatali@gmail.com	Ms	Ekila Tali	Student	Jawaharlal Nehru College,Pasighat	Agree	Agree	Agree	Agree	The topic,"Sustainable aquaculture Management " hasn't been discussed clearly as believed to be. We need to know the strategy and process on how to reared fishes in and around our environment without degrading the natural ecosystem by any means for example , rearing fishes in paddy fields .It will be much better if the given topic was pondered upon instead of focusing on history of places .Though I believed there's remarkably little hint given on "sustainable "management process ,yet we get to know more about various local fishes found in the state.
